

## ABOUT Q | CO

Born from the spirit of inquiry, q | co is a Colorado-based design and manufacturing house specializing in the production of high-end furniture, lighting, and object designs.

## AS A COMPANY, WE ASPIRE TO:

Create beautiful, enduring design without depleting the earth's resources

Infuse the built environment with the sense of wonder and curiosity often experienced in natural scapes

Foster sustainable careers for local artists, designers, craftsmen, and manufacturers

Employ strategic product/product life-cycle design to promote social and environmental well-being

## INQUIRY:

q | co was born from the spirit of inquiry and is structured to **advance individual design within a collaborative environment**. Designers work alongside each other—sharing resources and ideas to efficiently move designs from concept to reality. Together, we aim to propel the design conversation forward by continuously asking questions of ourselves, our designs, and our intentions as q | co.

## DESIGN:

q | co designs are marked by the intentional pairing of reciprocal dualities: movement and stillness, whimsy and poise, indulgence and restraint, **playfulness and sophistication**.

## MANUFACTURING:

As a manufacturing house, q | co specializes in merging skilled craftsmanship with modern technologies.

This dynamic dyad is essential to what we call **thoughtful manufacturing** and allows us to advance social and environmental ideals while producing high-end designs built to last for generations.
